

# Player Evaluation/ Selection

---

# Introduction

## Local Hockey Associations

- Player evaluation can be one of the most difficult tasks for a local hockey association to deal with. It can also be the foundation for which an association is built upon. In most cases, player evaluation is used to place players onto teams.
- For most local hockey associations, there are two types of evaluations:
  - 1) Evaluations during pre-season for selection on to teams (tiered or grouped).
  - 2) Evaluations at the end of the season as a post-season report card.
- Evaluations should also be used as a tool for coaches as a development framework based on the individual strengths and weaknesses of the players.

## Objectives

- To provide a fair and impartial assessment of a player's total hockey skills during the skating and scrimmage sessions to ensure they have a reasonable opportunity of being selected to a team appropriate to their skill level as determined during the on-ice evaluations of the current year.
- To provide coaches with the opportunity and flexibility to build a team based in part on their own coaching philosophy and knowledge of player skills and attitude.
- To provide uniformity and consistency in the evaluation process such that player and parent expectations are consistent from year-to-year as players move through the association.
- To form teams to maintain balanced and competitive play where players can develop and participate equitably and have fun during the hockey season.

## Coaches/Evaluators

- On-ice lead plus a minimum of 3 coaches on the ice to run the session.
- Minimum of four off ice evaluators to rate/score the players.
- Age-division coordinator to collect and tabulate the scores.

## Process

- A minimum of three evaluation sessions should be used to place players on teams:
  - Session 1 - Evaluation Plan 1
  - Session 2 - Evaluation Plan 2
  - Session 3 - Evaluation Plan 3
  - Session 4, 5 - Game Play

**Evaluation can be done cumulatively or after each individual session**
